BORDERS without BORDERS

DATE OF PROPOSAL SUBMISSION:

2 OF JULY 2022

A Mobile App aimed at facilitating the supply of necessities to people affected by the war in Ukraine, ranging from food to wi-fi services.

A Safe and effective distribution network supplying nutrition and medications to Eastern Ukraine.

Supporting Ukraine's war-time and post-war-time: solutions from Ukraine's largest community innovation hub.

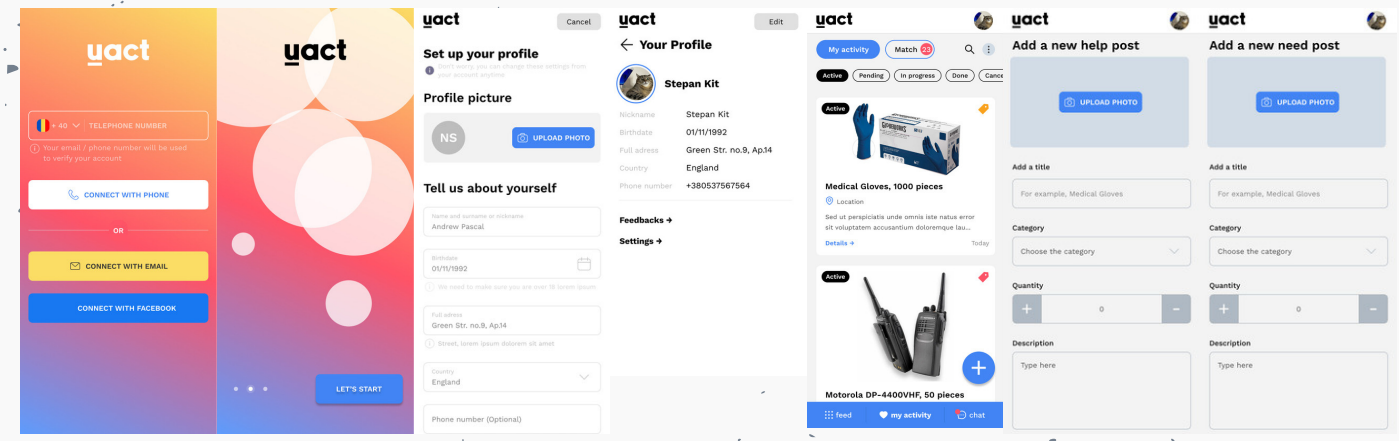
A program providing long-term housing for internally displaced people in the western region of Ukraine.

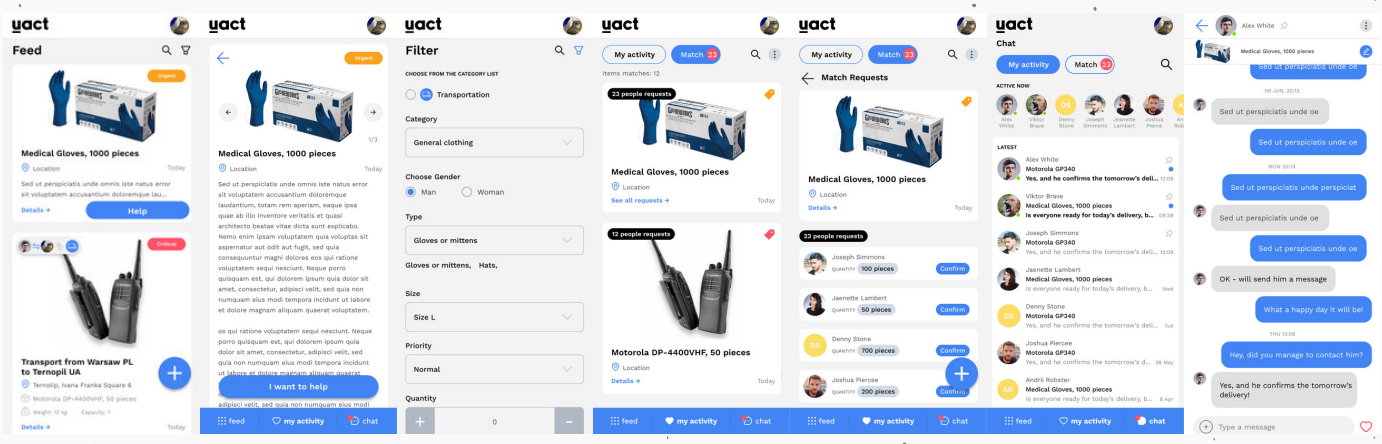
Purpose of the app:

- Improving aid supply networks to Ukraine
- Reducing redundant donations
- Extensive market research shows no permutations and urgent demand for a service facilitating supplies and services to Ukraine.

Functionalities of the app:

- Tracking requests and availability of goods.
- The algorithm searches for overlaps in supply and demand, matching the supplier with the recipient.





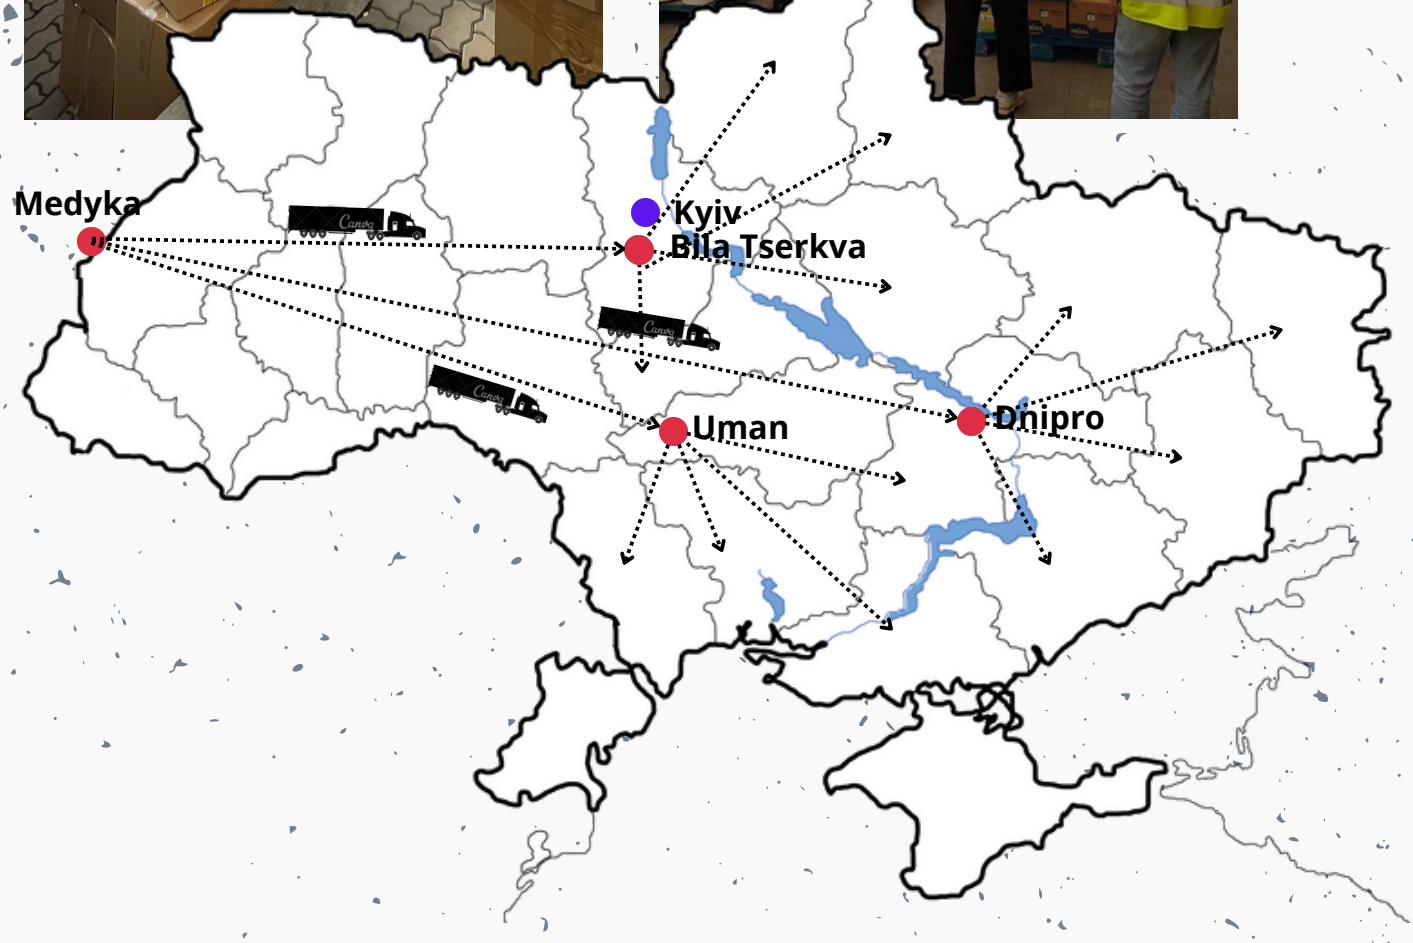
Purpose of the Warehouse:

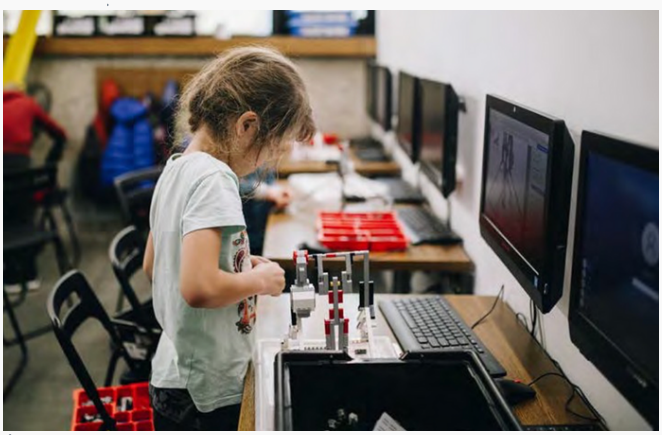
- Delivering necessities through a highly efficient supply network.
- Our network is the sole supplier of necessities to many remote urban areas.

Warehouse Capacity:

Our current fleet consists of 2 semi-trucks. Each can deliver:

- 30 000 meals (each 1900 calories)
- Two trucks can provide 112 million calories which can feed a town of 10 000 people for 3 days.





- Ukraine's largest operating incubator since 2017, stationed in a refurbished soviet era Factory complex
- Promprylad seeks to curtail Ukraine's loss of human and intellectual capital by giving professionals in Ukraine the resources to continue working.
- Curtailing the exodus of Ukrainians abroad is part of a shared, prudent response to the crisis {adopted by the European council} which aims at facilitating the rebuilding and repopulating of Ukraine by providing safe domains for internally displaced Ukrainians.
- Prompryolad, in addition to being an incubator, serves as a hub for developing solutions to Ukraine's most significant war-time adversities, e.g., infrastructure, relocation of displaced people, and supply network solutions.

So far, Promprylad:

- *refurbished 15% (38 200 sq. m.) of the factory's spaces*
- *Employs 500+ people*

Using the complex to its total capacity, Promprylad will provide:

- *a total of 5,000 jobs,*
- *120+ new companies*
- *Approx. 270 educational events and programs for entrepreneurs and innovators, giving more than 30,000 IDPs access to socio-cultural integration*

OUR PARTNERS:

Canada · Sweden Sverige · Western NIS Enterprise Fund · European Endowment for Democracy · USAID From the American People · PLEDDG · FCM · British Council · Federal Ministry for Economic Cooperation and Development · BMW Foundation Herbert Quandt · pact building local promise. · Heinrich Böll Stiftung Київ · Robert Bosch Stiftung · Swiss Agency for Development and Cooperation SDC · MitOst

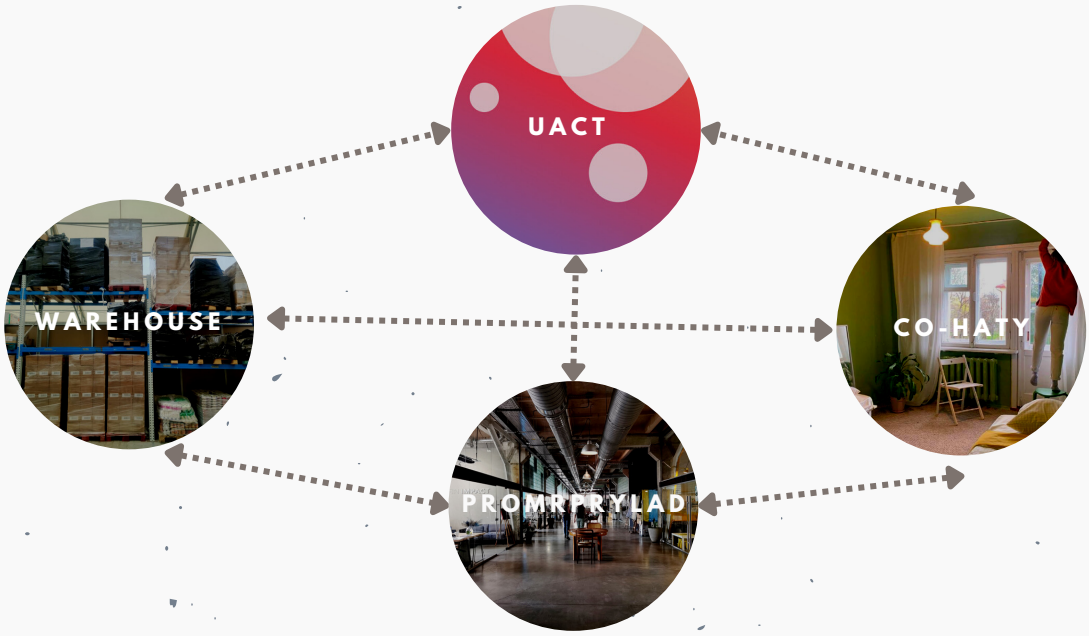
- Large-scale housing project in Ivano-Frankivsk providing safe residences for Internally displaced Ukrainians in western Ukraine by means of upcycling
- A team consisting of local urban planners and construction workers refurbishing vacant buildings

Co-haty's model significantly reduces:

- The movement of internally displaced Ukrainians abroad
- The ghettoization of eastern Ukrainian cities
- The time needed to complete construction of fully furnished homes due to the use of existing housing stock

Adversities:

- Around 30% of flats have been vacant for years
- A calm city located in western Ukraine, currently hosting 38 000 IDPs
- Housing provided by the city since early February is completely exhausted



The projects showcased in this presentation have become the focus of our efforts to support Ukraine, especially the internally displaced individuals.
All of the above are also interconnected.
We can use our supply chain to provide "Promprylad" and "Co-Haty" with the essential supplies.
The "UAct" application is needed for better connecting and facilitating the exchange of donations. As well as communicate what the companies based in Promprylad can provide to isolated Ukrainians, and so on.
